

ALLIS-CHALMERS
CLUB OF ONTARIO

For Sale

Description:

Two Allis Chalmers ED40's for Sale

The first ED40 tractor is serial #ED2443. The hour meter reads 1013.4. This ED40 was purchased new in about 1963 by two hobby farmers, one of whom was my father. The unit was lightly used and always stored under roof. It was running when it was stored in its current location about 5 years ago. The unit with the front end up on the blocks is ED2443.

The second ED40 tractor with the brush guard on the front is serial #ED1926. The hour meter reads 2637.0. This ED40 was originally purchased in the same vicinity as the first unit. I subsequently bought it about 5 years ago. According to the previous owner, it too was stored under roof. While the unit turns over it did not start when I first purchased it but I have not worked on getting it going since.

I have an original owners manual from ED2443 plus 2 copies.

Both of these ED40's are located in Sudbury, Ontario.

According to my research only about 200 units were imported to Canada over the period when the ED40's were produced in England in the 1960's.

I am asking \$5500 (Canadian \$'s) for both units sold together. Loading and shipping would be the responsibility of the buyer.
